Brewer Performance Matters

KEURIG® Descaling Solution

The descaling process is very important - because it removes mineral build-up that can happen over time. Depending on the mineral content of the water in an area, calcium deposits or scale may build up inside a brewer.

Keurig® Descaling Solution uses citric acid which is the ONLY approved solution for Keurig® brewers.

- Odorless
- Uses natural citric acid
- Works faster than alternatives
- Solution is biodegradable when used as directed
- Leaves no aftertaste
