

Neutral Floor Cleaners

Directions For Use

In floor care, product is used with a fringed mop or an automatic scrubber. Mix only with cold water.

Dilution Ratio

Task	Mop	Spray	Auto Scrubber
Light	1:125	1:42	1:500
Medium	1:80	1:25	1:200
Heavy Duty	1:50	1:12	1:125

HighMark Concentrated Solutions

Designed for institutional and commercial use, HighMark cleaning products are portable, easy-to-use and stand up against any national brand. With reusable dispensing heads and a cost-efficient concentrated formula, HighMark is the recommended go-to product line for all your professional cleaning needs.

Safety Reminder

Before using this product please ensure employees read and understand the product labels and Material Safety Data Sheet. Directions for use can be found on the label as well as the MSDS. Additionally, employees can find hazard warnings, precautionary statements and first aid procedures on the MSDS sheets. MSDS are available online at grandandtoy.com or by calling 1-866-391-8111. Improper use may result in damage or injury.

Product code	Package Size
98919	1 X 4L Bottle
98923	1 X 2L Bottle

Description	
Physical State and Appearance	Clear, Transparent Liquid
Colour	Light Blue
Sediment	None
Odour	Orange
pH (concentrated)	9.0 – 10.0
Specific Gravity	1.00 – 1.010
Flash Point	None

HighMark Portable Dispensing System

The Technology

The HighMark Portable Dispensing System automatically mixes concentrates with water, dispensing the diluted chemical into secondary containers such as mop buckets, spray bottles or equipment. It has two dilution options (high and low) which allows workers to measure precise amounts of concentrates into secondary containers.

It has been specially designed for use with the 2L chemical concentrates. The dilution rates for our 2L concentrates are pre-set at the factory, which make the units safer for the user by restricting the workers access to the concentrated chemical, as well as making it harder for workers to engage in unauthorized custom dilutions.

The HighMark Portable Dispensing System is easy to connect to 2L chemical concentrates, and features dual flow rates as well as built in backflow prevention.

Features

- Quickly disconnects to easily transfer to multiple areas
- Includes dual flow rates and built in backflow prevention
- Bottle, bucket and scrubbers fill
- Proprietary design used with HighMark Concentrated Cleaners
- Complete with quick disconnect
- No assembly or maintenance required; all 2L chemicals are pre-tipped at factory

Easy as 1-2-3!

HighMark Portable Dispensing System

Advantages & Benefits

Safety

Protects workers and environment from coming into direct contact with chemical concentrates at every stage of the process – from dispensing product to replacing used refill containers.

Savings

Saves you a significant amount of money as accurate chemical dispensing avoids spillage and dilution misuse.

Preparedness

The HighMark Portable Dispensing System is user friendly making training workers faster, easier and more effective.

Versatility

The HighMark Portable Dispensing System offers the option of two different dilution rates so that workers can find the perfect dilution for the job.

Performance

Minimizes the chance for human error when diluting chemicals, resulting in cleaning solutions which are at the optimal dilution to deliver consistent, quality performance and increased productivity.

Storage

Using concentrates with the HighMark Portable Dispensing System reduces the space needed to store chemicals at a facility.

Sustainability

Using concentrates with the HighMark Portable Dispensing System reduces packaging and transportation costs, as well as decreases landfill waste.
